EXPERIENCE

QA & Testing Intern

Jan 2026 - Jun 2026

Food Safety and Standards Authority of India (FSSAI Headquarters), Delhi (On site)

- Designed and executed test plans and test cases for multiple FSSAI portals including FoSCoS, Consumer Grievance System, AMS, and AMC.
- Developed end-to-end workflow diagrams (flowcharts) and validated all system flows, including edge cases and escalation paths.
- Performed manual testing to verify functionality, ensuring complete coverage of real-world regulatory scenarios.
- Identified, documented, and tracked bugs across modules, improving system reliability and process accuracy.
- Collaborated with stakeholders to validate fixes and ensure seamless implementation of workflows.

Tech Lead

Jul 2024 – May 2025

Innovators Quest Club, Vijayawada, India

- Used Excel to track and analyze participation data across 15+ events to support planning and decision-making.
- Managed a team of 10, delegated responsibilities, and ensured timely execution of club initiatives.
- Leveraged event feedback and participation trends to improve student engagement and support club growth.

Core Member & Event Organizer

Jul 2023 - May 2024

English Literacy Club, Vijayawada, India

- Orchestrated logistics for 10+ high-profile literary events, debates, and open mic sessions.
- Facilitated stakeholder communication between students and faculty, ensuring seamless execution of event protocols.
- Optimized event promotion workflows, resulting in consistently higher attendance and strengthened community visibility.

EDUCATION

Vellore Institute of Technology

May 2026

Bachelor of Technology in Computer Science & Engineering

CGPA: 7.8/10

City Montessori School

Jun 2022

Senior Secondary (CISCE - 12th) – 87.2%

City Montessori School

May 2020

High School (ICSE - 10th) – 89.6%

SKILLS

Programming & Databases - Python, Java, R, SQL, NoSQL, Redis

Tools & Technologies - Git, Excel, PowerPoint, Figma, REST APIs, LLMs, Prompt Engineering, AI-assisted Software Development

Cloud - AWS, Microsoft Azure (DP-900)

Professional Skills - Project Management, Cross-functional Collaboration, Technical Documentation

ACTIVITIES

Football Captain, Sahara FC - Led a 15-member team in regional tournaments, improving match win rate through strategic training and coordination.

Community Mentor - Taught and guided 50+ students in Junior Youth Empowerment Program, fostering collaboration and leadership.

PROJECTS

ATM Theft Detection System - A real-time security solution to detect fire, forced entry, or tampering in ATMs using image recognition and IoT sensors. Achieved 95% detection accuracy and reduced incident response time by 30% using Python, OpenCV, and IoT.

AI-Generated Quiz Website - A web app that automatically generates quizzes from text inputs using NLP. Deployed with AWS + SQL backend, supporting 500+ users and reducing manual quiz preparation time by 70% using Python, Flask, NLP Models.

Self-Aiming Smart Trash Can - Collaborated and implemented a Self-Aiming Smart Trash Can integrating Raspberry Pi, OpenCV, and MobileNet SSD for real time waste detection. Built a motorized base with relay control to autonomously move toward detected trash using camera-based centering logic. Achieved 5-20 FPS performance on edge hardware with low power consumption of 5W– 10W.

CERTIFICATIONS

Microsoft Azure DP-900 AWS - Cloud Foundations Cloud Architecting
